TOSHIBA
DIGITAL CAMERAS

- **3.37 MILLION PIXELS**
- **3x OPTICAL ZOOM**
- **2048 x 1536 RESOLUTION, SELECTABLE TO 1024 x 768**
- **USB INTERFACE FOR FAST DOWNLOADING (PC WINDOWS 98®, iMAC®, G3®)**
- **ULTRA FAST PROCESSING**
- **RECHARGEABLE LITHIUM-ION BATTERY**
- **AVI MOVIE FUNCTION WITH SOUND**
- **RECORD UP TO 60 MINUTES OF AUDIO ONLY**
- **6 MODE FLASH**
- **52mm THREADS FOR OPTIONAL LENSES AND FILTERS**
- **MEMORY: 24Mb INTERNAL BUFFER, UP TO 64Mb REMOVABLE SMARTMEDIA™**
- **SOFTWARE INCLUDED: IMAGE EXPERT®**
- **IMAGE CAPACITY WITH 16Mb SMARTMEDIA, 13 IMAGES AT HIGH RESOLUTION UP TO AS MANY AS 165 FOR WEB USAGE**
- **PC AND MAC COMPATIBLE (iMAC® AND G3®)**
- **TRUE PHOTOGRAPHIC EXPERIENCE**

Features

Toshiba proudly introduces to the market place its first three million megapixel filmless digital camera, the PDR-M70. The long-awaited camera allows consumers to digitally capture images of professional photographic quality in an easy-to-use design.

With its brushed-aluminum body and high-tech features, the PDR-M70 builds on the Toshiba tradition of award-winning digital cameras. Key to its success is an advanced 3.37 megapixel CCD capable of recording 2048 x 1536 pixel images that are exceptionally rich in sharpness, color accuracy and clarity. The 9/16 inch (.56") CCD is much larger than those found in past cameras, resulting in a less noisy signal and vastly superior pictures that can be printed in sizes up to 11" x 14" free of jagged edges, artifacts or pixelation.

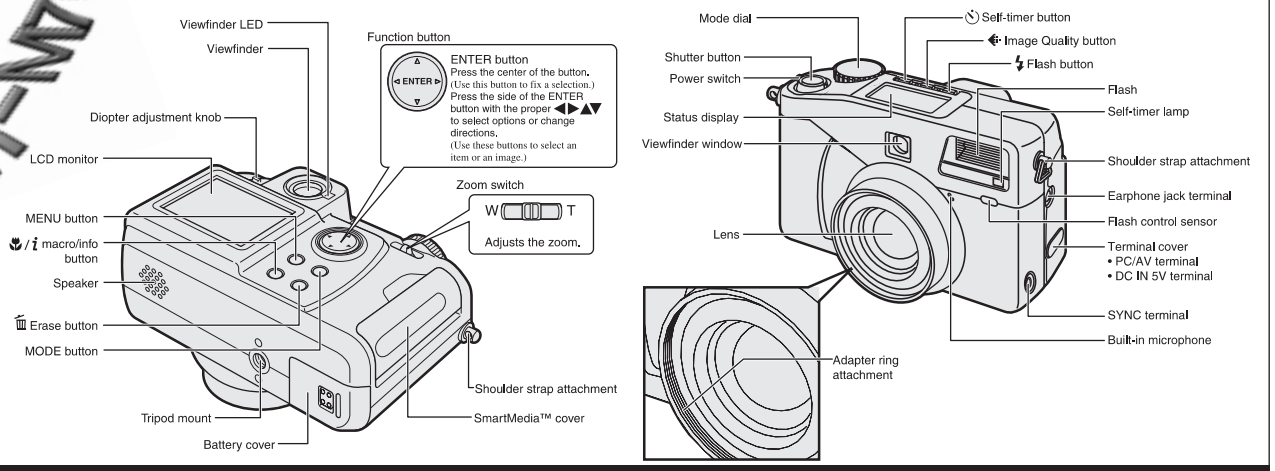
Important attributes of the PDR-M70 include: an all-glass aspheric lens system (f=7.0-21mm or 35-105mm in 35mm conversion) with 3x optical zoom, 2x digital zoom and an extra-large aperture of f=2.0-2.5; lightning fast download speeds (12 Mbps) via its USB port; 1.8-inch LCD with illuminator; built-in speaker/ microphone capable of recording up to sixty minutes of audio only on the included 16Mb SmartMedia™ card; plus an exciting and fun AVI movie function capable of recording up to five minutes of video (15fps) with audio on a 16Mb SmartMedia™ card.

An easy-to-navigate graphic user interface enables everyone from professional photographers to "digicam" rookies to be pointing, clicking and downloading images in minutes.

The PDR-M70—another exciting digital camera brought to you by Toshiba.

Toshiba–In touch with tomorrow.

PDR-M70



PDR-M70	
CCD Sensor	9/16 inch (.56") CCD Sharp; total pixels: 3.37 Million
Resolution	Full size: 2048x1536, Half size: 1024x768
Interface	USB (12Mbps)
Zoom Lens	3x Optical, 2x Digital
Movie Function	Max 300 secs/1 shot - Half & Basic mode
Boot Speed	Less than 3 seconds
Internal Memory	24Mb Internal Buffer
File Format	JPEG (Exif2.1)
Storage Media	SmartMedia™ 2-64MB, 16MB included
Firmware	Fully Upgradeable
Sensitivity	ISO equivalent 100/200/400
Lens	All glass aspheric lens F2 - F2.5
Focal Length	f=7.0mm-21mm (equivalent to 35mm -105mm on a 35mm camera)
